Reports and Discussions

1. Request for Additional Space – Shalom Day Care

Mr. Ruf reviewed the request from Shalom Day Care for additional space. He stated that administration is recommending that the Board not grant this request at this time.

Mr. Dempsey stated it was not in the best interest of the district to do so at this time.

2. Mathematics:

Dr. Bruno gave an overview of the math program. She stated it is a study in collaboration and change. The teachers wrote the curriculum following a charge developed by administration following a mandate from the community.

Our State assessment results have improved significantly. Nearly 99% of third graders and 97% of fourth graders including special education students are now passing. Grades 5, 6 and 7 are now in the high 90's including special education. Eighth grade passing rates moved from the mid 80's to the high 90's. Our next hurdle is moving students to mastery. Exceeding the standards is the goal we must keep our sites on.

Dr. Bruno noted that it is important to look at the cohort performance for each group of students. For the first time, 8th grade students did as well in the 8th grade as they did in the 4th grade.

Dr. Bruno thanked Roberta Silver, the PCT and teachers, the principals, the math committee, the Superintendent and the Board of Education for their continuous support.

Ms. Silver discussed ELA issues with regard to math. She reviewed the talking points, curriculum changes and our plans for next year. She stated the teachers will revamp the pre-assessments. We have revised the pacing charts to reflect the new textbooks and curriculum. In the fall, Ms. Silver and the math specialists will present talking points. She noted that our results will be sent to the data warehouse.

Ms. Silver thanked Dr. Bruno for all her support.

Mr. Daniel Rehman spoke about enVisions. He stated it was a success. They developed concepts and skills. The pacing and homework book worked well.

Ms. Jackie Kraker gave an update on the McDougal Littell Program at the middle level. She stated the test generator worked well. It was a duplication of the New York State Assessment. Ms. Kraker stated that the flash drive was great. She stated the weakness of the program is the textbook itself.

Discussion:

Mr. Cepeda has reviewed the scores and he noted that we have raised the bar considerably. He asked if we have looked at what materials are really working and which should be changed.

Ms. Silver stated that the teachers' evaluation is most effective for them. We have to take a look at the question(s) that many students have missed. When we look for solutions, we may find that we need more time. There is no one test prep book that will work for everyone.

Mr. Cepeda stated that the data analysis will bring this out.

Ms. Silver stated that consistency is meeting the needs of the children.

Mr. Cepeda stated that untimely this should be reflected in the results.

Mrs. Rothman stated that some of the concepts are more difficult for some children. Has enough time been allotted for these concepts.

Ms. Silver stated skills are constantly reiterated throughout the year. She stated that we have to work at the ELA connections.

Mrs. Rothman asked if the time spent with math is taking time away from other areas.

Mrs. Weinstein asked if we are providing extra time for math.

Ms. Silver stated that it is not automatic to provide more time.

Mr. Bettan complimented everyone for their hard work and for their success. This is a very big improvement. It is greatly appreciated. However, we should set the bar higher.

Mrs. Lieberman noted that two years ago the District was in a panic. Things have improved dramatically. She thanked everyone for working together to achieve these improvements. However, we want to go higher. We want to go to 4, 5 and 6.

3. International Baccalaureate Update

Dr. Bruno stated that the IB Teacher Committee, Middle School Committee, as well as middle school administrators are recommending a second year of study. We need to learn more about IB and how it fits-in in Plainview-Old Bethpage before making a decision about the Middle Years Program. IB sets a higher standard than the State standards—it sets an international standard. IB doesn't impose a curriculum; it makes our curriculum more rigorous. It includes all students and all subject areas. Next year our goal is to train teachers in all eight subject areas in both middle schools and to write one IB interdisciplinary unit at each grade level.

We have trained all ELA, science, social studies, reading and special education teachers in shared inquiry. Training will continue. Dr. Bruno outlined what we will be doing next year. She thanked the PCT and members of the committees and the six building administrators for their hard work.

Discussion:

Mrs. Bernstein asked if this document has been shared with the middle school teachers.

Dr. Bruno stated that it has been shared with the committee but not all staff.

Mr. Bettan noted that we have put in for middle years coordinators. This shows the Board's commitment to this program.

Mrs. Bernstein stated that we have said that we still need some kind of idea of what this is going to cost us going in.

Mr. Dempsey stated that coordinators are extra. We will put together an overview of the cost for the Board.

Dr. Bruno stated that online learning will be a considerable savings. The major cost is professional development. So far we have used the money we have allotted for professional development. It has been directed differently.

Mrs. Lieberman thanked Dr. Bruno for her report.

4. Enrichment for All Report

Dr. Bruno stated this was the first year of a new Enrichment For All initiative for all students, K-4. Stacey Bowden and Joyce Barry developed a program and Ms. Bowden implemented the program in all five elementary schools. Every student, every teacher and all five principals have provided feedback on the program. That feedback will be used to make adjustments so that the program can be even more successful next year.

Ms. Bowden reviewed the Enrichment For All Program.

5. Stimulus Proposal

Ms. Ellie Becker reviewed the funding available from the stimulus funds. She developed a plan to apply for the grant. The money is given to us over a two year period. The plan is to purchase seven smart boards, 35 computers and hire a .4 Assistive Technology teacher. She wants to hire transition coordinators to work with employers in the community. We plan to purchase a data collection system. We want to hire a full time school psychologist. We want to improve training instruction for teachers using Read 180 and System 44. She outlined the other things we hope to do with the stimulus funds.

Discussion:

Mrs. Weinstein asked if we will be able to integrate this with the student management system.

Mrs. Bernstein expressed her concern about the staffing implication. She wants to know how we will be handling the staffing.

Mr. Dempsey stated we won't commit for more than two years.

Mrs. Lieberman thanked Ms. Becker for her report.

Public Participation

Ms. Gloria Lynch requested that District policy be changed to not allow baseball to be played at the POB Middle School field by any one other than school children. She stated that she can't sit in her backyard when baseball is being played. There is no security. She reiterated her request that we rescind the permit for baseball by anyone other than school children.

Mr. Wolfner asked for an explanation of several items under Finance.

Dr. Robert Stanton commended the people involved with Enrichment For All. He congratulated Dr. Bruno. He stated that he is pleased with the math results. However, passing should not be our goal. He would like to see where we stand with level 4 compared to other school districts as well as see the comparison of passing scores.

Ms. Andrea Goldman asked about the food service contract.

Ms. Suzall commended the Board on our budget. She noted that a lot of children will be involved in Project Challenge. How will we facilitate this.

Dr. Bruno discussed how the staff will be deployed.

Ms. Suzall asked about differential teaching. Not all materials are available in all schools for all students. Ms. Suzall noted that Plainview Middle School and Mattlin Middle School are almost equal in the grade scores. She stated that Pasadena has remained almost exactly the same. Old Bethpage and Parkway have gone up. She is concerned when these third graders go into the 4th grade.

Mr. Dempsey stated that the cycle has been upward. The data has to be analyzed. There has been much improvement in language arts.

Ms. Suzall reiterated her concern about third grade going into fourth grade

Mrs. Weinstein noted that there has been a big jump in the 3rd grade to 4th grade cohort.

Ms. Suzall commended Dr. Bruno for all she has accomplished during her two years in Plainview.
